SUMMARY

Computer Science undergraduate at Bennett University with a strong CGPA of 8.58, specializing in Machine Learning, AI, and Full-Stack Web Development. Experienced in building end-to-end ML pipelines, React-based web applications, and deploying AI-powered solutions. Open-source contributor with hands-on industry experience through internships and hackathons.

EDUCATION

B.Tech in Computer Science | Bennett University

Expected Aug 2028

CGPA: 8.58 / 10.0 • Relevant Coursework: *Data Structures & Algorithms, Machine Learning, Design & Analysis of Algorithms, DBMS, OOP*

TECHNICAL SKILLS

Languages & Frameworks

- Python, JavaScript, HTML/CSS, SQL
- React.js, Node.js, Express.js
- REST APIs, Dialogflow

AI / ML & Tools

- Machine Learning, NLP (BERT, Transformers)
- TensorFlow, Scikit-learn, Pandas, NumPy
- Git & GitHub, VS Code, Jupyter Notebook

EXPERIENCE

Artificial Intelligence Intern | EdiGlobe

Jun 2025 – Aug 2025

- Assisted in developing AI models for data analysis and pattern recognition, improving model accuracy by iterating on feature engineering and hyperparameter tuning.
- Prepared and cleaned datasets for training algorithms; validated model outputs and documented testing results across multiple ML pipelines.
- Collaborated with senior engineers to integrate AI components into production workflows, gaining exposure to end-to-end ML deployment.

Open Source Contributor | GirlScript Summer of Code (GSSoC)

Sep 2025 – Nov 2025

- Contributed to open-source repositories, resolving issues and submitting pull requests reviewed and merged by project maintainers.
- Strengthened proficiency in Git & GitHub workflows including branching, code review, and collaborative development best practices.

PROJECTS

Propaganda Detection Model using BERT

2024

- Fine-tuned a BERT transformer model on a labeled propaganda dataset to classify news text, achieving strong precision and recall metrics.
- Built a preprocessing pipeline using Python (HuggingFace Transformers, Pandas) and evaluated model performance with confusion matrices and F1-scores.

Amazon E-Commerce Clone – React.js

2024

- Developed a fully responsive e-commerce front-end using React.js with component-based architecture, dynamic routing, and state management via React Hooks.
- Implemented product listing, cart, and checkout UI; styled with CSS modules for a pixel-perfect, mobile-first layout.

AI Mental Health Support Website – Hackathon (48 hrs)

2024

- Built and deployed a mental health support web platform within 48 hours during a hackathon, integrating an AI chatbot for empathetic user interaction.
- Designed the full-stack architecture using React.js front-end and a Node.js/Express backend; recognized by judges for social impact and technical execution.

AI Chatbot using Dialogflow API

2023

- Built a conversational AI chatbot leveraging Google Dialogflow for natural language understanding, integrated via REST API into a web interface.
- Designed intent flows and trained the agent on domain-specific utterances to improve response accuracy.

ACHIEVEMENTS & ACTIVITIES

- State-level Football Player – represented institution in competitive inter-state football tournaments.
- CGPA 8.58 / 10.0 – consistently maintained academic excellence across all semesters at Bennett University.
- GSSoC Contributor – one of the selected contributors in a nationally recognized open-source program.
